

Paul Franklin-Bihary

After working as a building representative at Ingraham High School for many years and seeing the need for our union to grow in strength and influence, I would like to play a larger role for our high schools in the north end of our city by serving as a High School Grade Level Representative on the SEA board. Participating in the 2023 WEA RA opened my eyes to how one person can make change in important aspects of our work in solidarity with others. I hope to use my voice to improve safety in our school communities, get fair pay for non-certificated staff, improve counseling ratios, and hold district management accountable to ever-increasing staff and student needs that are so often ignored. I appreciate your vote and look forward to doing more to help our schools thrive!
